

AI Use Log for Your Pitch

Why keep this log? When you are preparing a pitch, AI can help with research, drafting, slide design, market comparisons and more. If a jury member asks how AI contributed to your work, this log lets you answer clearly and confidently. It is not about avoiding AI — it is about showing what AI generated, what you checked, and what you decided.

How to use this log

Each time you use AI while working on your pitch, fill in one row. Be specific: name the tool, describe what it produced, and note what you changed or verified. The goal is to separate AI-generated content, human checks and human decisions.

Date	What I used AI for	AI tool used	What AI produced	What I changed / checked	How I verified it	Final decision

Remember: AI generated · Human checked · Human decided. Transparency builds trust — and trust is what turns a good pitch into a convincing one.
